

# Electric Service and the Development of Natural Resources

The year that is passing has been fruitful for Utah and the inter-mountain west.

Splendid crops have been harvested; sheep and live stock are faring well; the canneries and sugar factories have enjoyed exceptionally good runs; other manufacturers are busy and optimistic; jobbers, wholesalers, and merchants are closing a prosperous twelve months; mines and mills are under strong headway.

Everywhere eyes are to the front, the hopes are high and, best of all, the New Year returns a smile of encouragement.

For the part it has been our good fortune to play during 1915 in helping the manufacturers of the inter-mountain region solve their operating problems; for the good that electric service has accomplished in mines and mills; for the added comforts and conveniences electric service has brought the farmer and his wife; for the opportunity that has been ours to lighten the work and the cares of the cities' men and women, the Utah Power & Light Company is deeply appreciative.

It is our earnest wish that we may continue to do our full share in the development of Utah and this entire inter-mountain region.

## UTAH POWER & LIGHT COMPANY
